MongoDB, Cloud Firestore

Programming Languages:

Python, Java, Javascript, C++

Developer Tools

Git, Postman, Figma, Firebase, Docker

About me

Self-motivated and hard-working fresher seeking an opportunity to work in a challenging environment to improve my skills and utilize my knowledge & intelligence in the organization's growth. I have used many different tools and programming languages focusing mainly on building REST API, Mobile Applications and Websites. I am good at understanding designed documents, problem-solving, flexibility to adapt to changes in direction. After four years at UIT gain me the ability to work effectively independently and collaboratively in teams, meet deadlines, and work under pressure.

Education

University of Information Technology - VNUHCM   *Sep 2019- Present*

Major: Computer Networks and Communications

GPA: 7.7/10

Projects

ChessLovers   *Jun 2022- Present*

Github: https://github.com/Dkhoa-117/ChessLovers

Description: chess AI application and REST API, using minimax algorithm.
Front-End: HTML, CSS, Javascript, Pugs
Back-End: NodeJS, Express, Firebase Firestore & Auth, Jest

Embed-WemosD1   *Feb 2022- Jun 2022*

Github: https://github.com/Dkhoa-117/Embed-WemosD1

Description: a class project, embedded programming for Wemos D1 board. Also, build an Android Mobile Application for users to interact.
Technology in use: Java, C++, Arduino, Firebase Firestore

WorkLovers   *Apr 2022- Jun 2022*

Github: https://github.com/Dkhoa-117/WorkLovers-API

Description: a team project, an Android application used for timekeeping and automatically calculating wages for employees. Focus on application security.
Technology in use: NodeJS, Java, Postman, MongoDB, Firebase Auth, Firebase Messaging
Security practices: JWT double token, Proguard, Sign APK
